24th Nov 2020

The
SMART
Centre
Group

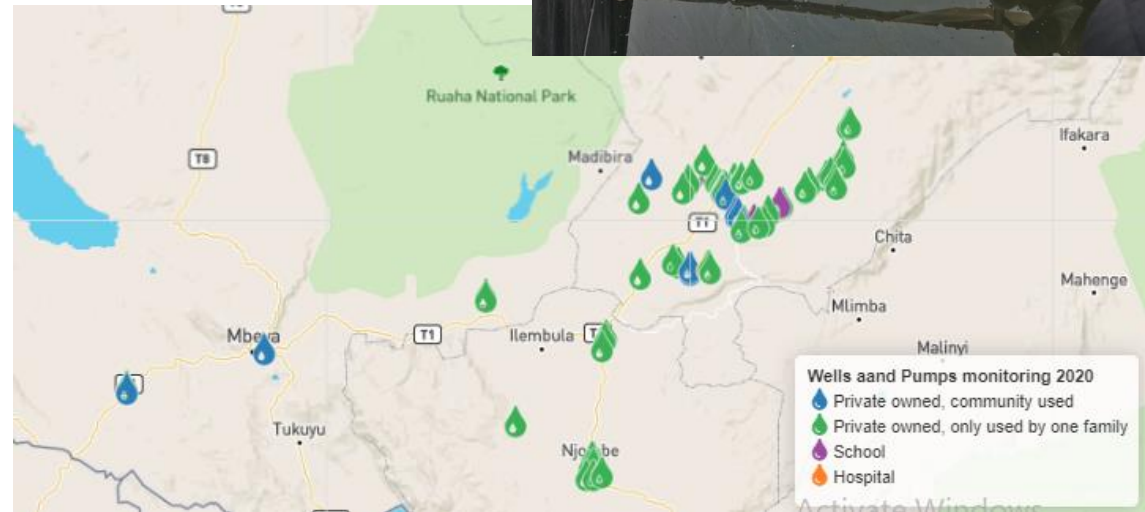

SHIPO
SMART Centre
Tanzania
Member of the SMART Centre Group

Key 2020 activities

- SKAT-Drink & Donate funded project – Capacity Building for local artisans on SMARTechs for WASH
- Njombe Beyond project– Plastic recycling on a small scale
- Demo- plot development – Show case of productive use of water
- Other activities and opportunities

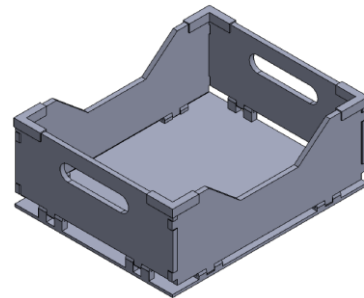

SKAT project 2020

- Training – 9 drillers and 5 pump producers + 32 farmers (shorter and with strict measures due to COVID-19)
- Monitoring of 85 water points and farmers' activities
- MoU signed with the Water Institute

Njombe Beyond

- 2 recycling machines: injection and compression
- Market the first products and more in development

- Awareness raising activities on environment

Demo - plot

- Organic garden + greenhouse + fish ponds
- Pumps, tanks, drip irrigation kits: productive use of water

Other activities and opportunities

- COVID-19 response: hand-washing facilities for health centers
+ promotion of face shields
- Well rehabilitation by AUARA (new partner for water projects)
- Starting relationship with COSTECH (Tanzania Commission for Science and Technology) opportunity for SMARTechs to spread to other regions through their Technology Management and Transfer Department
- Development of new projects: e.g. development of new SMARTechs in a hub with a focus on zero waste
